#### **DETAILED ACTION**

1. The cancellation of claims 1-15 and 23-28 in Paper filed on 6/22/05 is acknowledged.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 16-18 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukasawa et al (US. 4,871,110).

Fukasawa (Fig. 1) discloses a ball film for fabricating integrated circuits, comprising: a thin film 1 formed from two separate thin films 2 and 3 and comprising a plurality of slots 5; and a plurality of metal balls 9 each movably contained within a respective one of the plurality of slots 5, wherein the slots 5 are spherically shaped and the metal balls 9 are formed from solder (column 2, lines 16-22).

3. Claims 16, 18, 20 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Ochiai et al (US. 5,643,831).

Ochiai (Fig. 1C) discloses a ball film for fabricating integrated circuits, comprising: a thin film 10 formed from two separate thin films 1 and 2 and comprising a plurality of slots 12; and a plurality of metal balls 20 each movably contained within a respective one of the plurality of slots 12, wherein the metal balls 20 are formed from solder and each has a diameter of 100 um (column 5, lines 11-14).

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fukasawa et al <u>or</u> Ochiai et al in view of Ball (US. 6,426,564).

Neither Fukasawa nor Ochiai discloses that the thin film is made of polyimide.

However, Ball (Fig. 8A) teaches a ball film comprising a thin film 20 of polyimide (column 6, lines 8-13) comprising a plurality of slots 22. Accordingly, it would have been obvious to form the thin film of Fukasawa or Ochiai with polyimide material because polyimide is non-wettable and is able to withstand the thermal stresses induced by thermal expansion mismatch between the integrated circuit die and the thin film, as taught by Ball (column 6, lines 13-20).

5. Claims 19 and 21-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fukasawa et al (US. 4,871,110) in view of Hayes (US. 5,861,323).

Regarding claim 19, Fukasawa does not disclose that the thin film 1 is made of polyimide.

However, Hayes (Fig. 3) teaches a ball film comprising a thin film 22 made of polyimide and comprising a plurality of slots 24. Accordingly, it would have been obvious to form the thin film of Fukasawa with polyimide material because polyimide is also an insulating material, as taught by Hayes (column 3, lines 35-38).

Regarding claims 21-22, Hayes further teaches that the thin film 22 comprises a thickness of between 15 um and 125 um (column 3, lines 39-41), and the metal balls 86 each has a diameter of between 50 um and 800 um (column 3, lines 43-45). Accordingly, it would have been obvious to form the thickness of the thin film and the diameter of the metal ball of Fukasawa with the dimensions as claimed because the thickness of the thin film can be optimized depending upon the size of the metal balls used, as taught by Hayes (column 3, lines 39-43).

## Response to Arguments

6. Applicant's arguments with respect to the previous rejection(s) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

However, upon further consideration, a new ground(s) of rejection is made in view of the new references cited.

#### Conclusion

- 7. This action is made non-final.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phat X. Cao whose telephone number is 571-272-1703. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on 571-272-1705. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
